

Audience Behavior Analysis Report

Prepared by: StreamCo Data Science Team

Analysis Period: Q3 2024 — Q1 2025

Sample Size: 14.2 million active subscribers

Watch Pattern Analysis:

Peak viewing hours remain consistent at 7 PM — 11 PM local time across all markets, with 67% of daily watch time concentrated in this window. Weekend viewing is 34% higher than weekday averages. Tuesday has emerged as the weakest viewing day, while Friday shows the strongest engagement. Average daily viewing time per user is 1.8 hours, up from 1.6 hours in the previous analysis period.

Binge Behavior:

Binge viewing (defined as watching 3+ episodes or 2+ movies in a single session) occurs in 28% of all sessions. Binge sessions are most common among the 25-34 age group (36% binge rate) and least common among 55+ viewers (14% binge rate). Sci-Fi and Thriller genres have the highest binge rates at 35% and 31% respectively. Comedy content shows a notably lower binge rate of 18%, suggesting episodic rather than serialized consumption patterns. Premium subscribers binge 42% more frequently than Basic tier users.

Device Preferences:

Smart TV has overtaken Mobile as the primary viewing device, representing 38% of total watch time (up from 31%). Mobile remains strong at 32%, particularly for short-form content and commute viewing. Desktop viewing continues to decline, now at 15%. Tablet viewing holds steady at 15%. Multi-device viewing (starting on one device, continuing on another) increased 56% and now accounts for 12% of all sessions. The average viewer uses 2.3 different devices per month.

Genre Consumption by Demographics:

18-24 age group: Sci-Fi (32%), Action (28%), Comedy (22%), other (18%). 25-34 age group: Thriller (29%), Sci-Fi (26%), Action (21%), Romance (14%), Comedy (10%). 35-44 age group: Action (27%), Thriller (24%), Drama (20%), Comedy (15%), other (14%). 45-54 age group: Thriller (30%), Action (22%), Romance (20%), Comedy (18%), other (10%). 55+ age group:

Romance (28%), Thriller (24%), Comedy (22%), Action (16%), other (10%).

Subscription Tier Behavior:

Free tier users average 45 minutes daily viewing with 52% completion rates. Basic tier users watch 1.4 hours daily with 64% completion rates. Premium tier users are most engaged at 2.3 hours daily with 78% completion rates. Enterprise tier users show similar patterns to Premium but with higher multi-device usage.

Content Discovery:

Algorithmic recommendations drive 45% of content starts. Browse and search account for 30%. Social media referrals account for 15%. Email recommendations account for 10%. Users who engage with recommendations watch 40% more content monthly.

Churn Indicators:

Declining weekly watch time (below 30 minutes) predicts churn with 73% accuracy. Users who do not watch any content for 14 consecutive days have a 62% probability of churning within 60 days. Low completion rates (below 40%) across multiple titles indicate content dissatisfaction. Price sensitivity is highest among Basic tier users in the 18-24 age group.

Retention Drivers:

Exclusive original content is the primary retention driver, cited by 58% of retained subscribers. Multi-profile support increases household retention by 34%. Personalized recommendations improve retention by 23%. Early access to new releases motivates 41% of Premium upgrades.
