

Content Roadmap 2025 — StreamCo Studios

Classification: Internal Use Only

Version: 3.2 | Last Updated: March 2025

Strategic Vision:

StreamCo's 2025 content strategy focuses on three pillars: expanding our Sci-Fi franchise universe, revitalizing our Comedy slate, and establishing a premium Thriller brand. Total production budget for 2025 is \$340 million across 28 planned titles, representing a 25% increase from 2024.

Upcoming Titles — Q2 2025:

Stellar Run 2: Sequel to our biggest hit, with a \$65 million budget. Pre-production is complete, principal photography begins April 2025. Target release: October 2025. Early audience testing shows 92% interest among viewers who watched the original.

Nebula's Edge: Original sci-fi thriller hybrid, budget \$42 million. Currently in post-production with a July 2025 release target. Features breakthrough visual effects technology.

City of Shadows: Action-thriller crossover, \$38 million budget. Release planned for August 2025.

Genre Strategy:

Sci-Fi: Our strongest performing genre. We are building a shared universe connecting Stellar Run, Dark Orbit, and Void Protocol. This franchise approach mirrors successful strategies in theatrical releases. Budget allocation: \$95 million (28% of total).

Action: Maintain current output of 4-5 titles per year. Focus on mid-budget (\$25-35M) titles with proven directors. Budget allocation: \$75 million (22%).

Thriller: Underserved genre with high per-viewer revenue. Increasing slate from 3 to 5 titles. Budget allocation: \$60 million (18%).

Comedy: Requires strategic overhaul. Current comedy titles show lower completion rates and revenue per viewer compared to other genres. New approach: invest in fewer, higher-quality comedy specials rather than full-length features. Partnering with established comedy talent for exclusive content. Budget allocation: \$55 million (16%).

Romance: Steady performer with loyal audience base. Exploring limited series format for romance content. Budget allocation: \$40 million (12%).

Production Pipeline:

Currently in active production: 8 titles. In post-production: 4 titles. In development (script/pre-production): 12 titles. Greenlit, awaiting scheduling: 4 titles.

Technology Investments:

Virtual production stages: \$12 million investment in LED volume stages. AI-assisted post-production: \$5 million pilot program for VFX acceleration. Cloud rendering: Partnership with major cloud provider for distributed rendering.

Distribution Strategy:

Day-and-date release on StreamCo platform for all original titles. Select theatrical windows (2-4 weeks) for tentpole releases. International licensing agreements for 15 additional territories in 2025.
